Fibresales Fibre Optic  
Pre-Terminated Cable

---

Fibresales Pre-Terminated Fibre Optic Cables are available in multimode OM1, OM3, OM4 and singlemode.

We offer the Fibresales Pre-Terminated Fibre Optic Cables as an Indoor/Outdoor distribution style cable that also includes a Water Blocking Yarn to add to the protection of any unwanted water ingress.

The Fibresales Pre-Terminated Fibre Optic Cables are usually provided in fibre counts of 6, 12 and 24 fibres.

The connectors that are typically factory installed by us are LC, SC, ST, SCA, LCA, FC, FCA although we can also offer a variety of other connector styles. So contact us to discuss any particular requirement you may have.

We provide a 50cm breakout to add the protection to each fibre and these are colour - coded to suit the appropriate glass.

Orange Zero Fibre - Multimode OM1

Aqua Zero Fibre - Multimode OM3

Erika Violet Zero Fibre - Multimode OM4

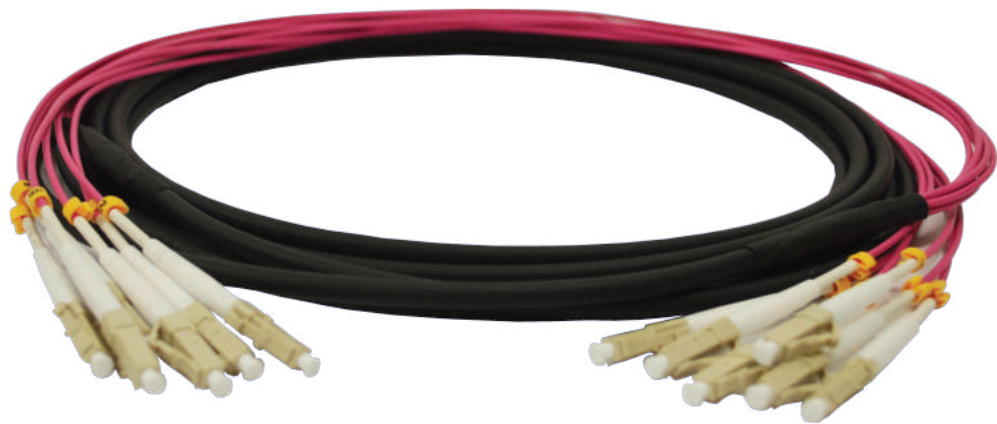

Yellow Zero Fibre - Singlemode

We offer a full custom manufacturing service and can therefore cater for all of your requirements.

## What are the advantages of using Fibresales Pre-Terminated Fibre Optic Cables?

1. Rapid Installation - Install a finished product immediately. You do not need to coordinate connectorisation, splicing and testing. It is all completed for you.
2. Cost Effective - Onsite man hours are expensive. Most of the work has been done off site and therefore a major cost saving for your project.
3. No Expensive Fibre Optic Equipment Required - Fibresales Pre-Terminated Fibre Optic Cables do not require the use of expensive Fusion Splicer or Fibre Optic Termination Tools
4. Ready to Use - Assembled, Terminated, Tested and ready to install.
5. Factory Terminated - All cables are factory terminated with each fibre being individually tested and shipped complete with test results
6. Low Losses - As the Fibresales Pre-Terminated Fibre Optic Cables are all factory terminated they all come with extremely low losses when compared to field terminations.
7. Easy to Install - Installations do not typically require specialist equipment onsite and do not require highly skilled fibre optic technicians. Pull the cable in using the specifically installed Pulling Eye, Connect Up and you are ready to go!
8. Custom Manufacturing - Your Fibresales Pre-Terminated Fibre Optic Cable will be custom made to the exact length using the connectors of your choosing project by prokect. You are in full control of your specifications

For those in a hurry you should enquire about our stocked range of Fibresales Pre-Terminated Fibre Optic Cables. For your benefit we carry a full range of LC and SC multimode OM3 and Singlemode 6 fibre cables from 50 metres through to 275 metres (usually in stock in 25 metre increments).

Call us, you may be surprised at what we can deliver to you immediately!

As you would come to expect from all rapidconnect products - the rapidconnect Pre-Terminated Fibre Optic Cables are fully tested and these test results are provided with the products at time of delivery.

### All Fibresales Pre-Terminated Fibre Optic Cables are available with the following options:

- Pulling Eye for ease of pulling and added protection to the connectors at the pulling end.
- Staggered Connectorisation for ease of pulling into tighter spaces
- Labelling if required
- Rolled onto a Cable Drum if required (Recommended for lengths in excess of 50 metres)
- Variations can be made to the standard 50cm breakout length
