Fibresales Isopropyl Alcohol (IPA) for Fibre Optic Cleaning

Fibresales Isopropyl Alcohol (IPA) is a high-purity, fast-evaporating cleaning solution designed specifically for fibre optic maintenance. It effectively removes oils, dust, and contaminants from fibre optic connectors, splices, and equipment, ensuring optimal signal performance. The IPA evaporates quickly and leaves no residue, making it a trusted choice for professionals in the field.

Applications:

- Cleaning fibre optic connectors before splicing or testing.
- Removing oils, dust, and contaminants from ferrules and splice points.
- Routine maintenance of fibre optic cables and associated equipment.
- Safe for single-mode and multi-mode fibre optic systems.

Key Features:

- **High-Purity IPA:** Specially formulated for fibre optic cleaning, ensuring no residue or additives are left behind.
- **Rapid Evaporation:** Dries quickly, allowing cleaned components to be used almost immediately.
- **No Residue:** IPA leaves no film or residue, which could interfere with signal transmission.
- **Non-Corrosive:** Safe for use on delicate fibre optic components without risk of damage or corrosion.
- **Versatile Use:** Suitable for cleaning connectors, ferrules, splices, and sensitive optical equipment.

Technical Specifications

- | | |
|------------------------|--|
| • Chemical Formula | - C ₃ H ₈ O (99.9% Pure Isopropyl Alcohol) |
| Evaporation Rate | - Rapid, leaving no residue |
| Bottle Sizes Available | - 250ml, 500ml |
| • Storage Instructions | - Store in a cool, dry place away from direct sunlight |
