fibresales Fibre Optic Kevlar Scissors

Kevlar Scissors

The fibresales Kevlar Scissors are a professional-grade tool designed for cutting the tough Kevlar reinforcement found in fibre optic cables. Engineered for precision and durability, these scissors feature micro-serrated stainless steel blades that deliver clean cuts with ease. Ideal for fibre optic technicians, these scissors ensure fast, efficient cable preparation while maintaining control and accuracy.

Applications:

- Fibre optic cable preparation for installation and maintenance
- Cutting Kevlar reinforcement within fibre optic cables
- General cutting of tough, reinforced materials used in telecommunication cables

Features:

- **Precision Cutting:** Micro-serrated blades grip Kevlar fibres securely, preventing slipping and ensuring clean, accurate cuts.
- **Durable Build:** Made from high-quality stainless steel for long-lasting sharpness and corrosion resistance.
- **Ergonomic Handle:** Designed for comfort with a non-slip grip to reduce hand fatigue during extended use.
- **Compact and Portable:** Lightweight and easy to carry, making it convenient for fieldwork. e slits every time, reducing the risk of damaging delicate fibre cores.

Technical Specifications

- **Blade Material:** High-grade stainless steel with micro-serrated edges
- **Blade Length:** 55mm
- **Overall Length:** 140mm
- **Weight:** 85 grams
- **Handle Design:** Ergonomic, non-slip grip
- **Corrosion Resistant:** Yes
- **Application:** Kevlar fibres in fibre optic cables and other tough materials
- **Cutting Capability:** Ideal for cutting Kevlar, aramid yarns, and cable jackets
