Rotary Cable Stripper**

Rotary Cable Stripper

The fibresales Rotary Cable Stripper is a high-performance tool designed for precise stripping of fibre optic cables. Its adjustable rotary blade accommodates various cable sizes, ensuring clean, consistent cuts. Compact and lightweight, this tool is ideal for both fieldwork and lab environments, providing reliability and ease of use for fibre optic technicians

Applications:

- **Telecommunications:** Suitable for stripping fibre optic cables in telecom networks.
- **Data Centres:** Ideal for network installations requiring accurate stripping.
- **FTTx Installations:** Ideal for fibre-to-the-home (FTTH) and fibre-to-the-premises (FTTP) setups.
- **Fieldwork and Maintenance:** A reliable tool for technicians working in the field, ensuring consistent performance.

Features:

- **Adjustable Rotary Blade:** Provides flexibility to strip various cable sizes between 2mm and 6mm without changing tools.
- **Precision Stripping:** The rotary mechanism ensures accurate, clean cuts without damaging the fibre core.
- **Compact and Lightweight Design:** Weighs only 100g, making it easy to carry and handle in the field.
- **Ergonomic Handle:** Non-slip, comfortable handle reduces hand fatigue during extended use.
- **Durable Build:** Constructed from high-quality materials, ensuring long-lasting performance in both indoor and outdoor environments.

Technical Specifications

- Stripping Range: 2mm to 6mm diameter cables
- Blade Type: Adjustable rotary blade
- Weight: 100g
- Dimensions: 120mm x 30mm x 20mm
- Handle Material: Plastic with non-slip grip
- Blade Material: High-grade steel
- Operating Temperature: -10°C to +50°C
- Storage Temperature: -20°C to +70°C
