## fibresales Fibre Optic Talk Set (Pair)

## fibresales Fibre Optic Talk Set

fibresales Fibre Optic Talk Set is designed to achieve crystal clear, full-duplex, hands-free communication over any spare Singlemode fiber optic cable. These talk sets give fiber optic installers and technicians a reliable and cost-effective solution to communicate over long distances for a long period of time, whereas alternative RF devices can often be costly, ineffective, and irritating to use.

With features including; a simple menu system, adjustable backlight, automatic call detection, user-selectable backlight, flip-out stand, and a comfortable headset, using a fibre optic talk set has never been so easy.

### Applications:

- Fibre Optic Network Installation
- Maintenance and Troubleshooting
- Emergency Communication
- High-Noise Industrial Environments

### Features and Benefits:

- **Clear Audio Communication:** High-quality audio ensures effective communication over long distances.
- **Durable Design:** Built to withstand rugged environments with a shock-resistant housing.
- **Extended Battery Life:** Provides hours of operation.
- **Easy-to-Use Interface:** Intuitive controls and indicators for simple operation.
- **Wide Compatibility:** Works with standard fibre optic communication links.
- **Portable and Lightweight:** Compact design for easy transport and deployment.

### Specifications

|                    |                                                                    |
|--------------------|--------------------------------------------------------------------|
| Wavelength         | A: 1310nm, B: 1550nm                                               |
| Operating Style    | Full duplex communication                                          |
| Output Power       | > -5dBm                                                            |
| Fiber Type         | SM                                                                 |
| Dynamic Range*     | SM fiber: 45dB                                                     |
| Dynamic Distance*  | SM fiber: > 120 km                                                 |
| Connecting Adapter | FC / PC                                                            |
| Battery Charge     | Optional                                                           |
| Operate Time       | Above 12 hours                                                     |
| Temperature        | Storage: -20 -- +60 °C, < 90%RH; Operating: -10 -- +50 °C, < 90%RH |
| Power Supply       | 2 * AA batteries or AC/DC adapter                                  |
| Size / Weight      | 190mm * 75mm * 40mm / About 200g                                   |
