FIBRESALES FIBRE OPTIC Pigtails

900um Fibre Optic Pigtails

900um Fibre Optic Pigtails are easy to strip with a thin and flexible buffer, this ultimately saves time by reducing the effort spent on the tedious stripping process allowing for greater efficiency overall.

Stock Availability

A wide range of multimode and singlemode 900um Fibre Optic Pigtails are carried in stock, however, should you have a large requirement, then our manufacturing lead times are very good.

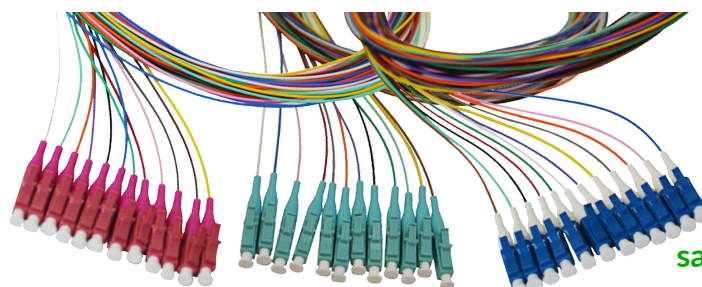

Flexibility

900um Fibre Optic Pigtails are provided as standard in either 6 or 12 packs at 1.5 metres long, however, if you have other requirements we would be pleased to assist you with the design.

Visible Cable Management

One of the key features with all 900um Fibre Optic Pigtails is the ability to know the product that you have in front of you by just looking at it. Due to the nature of the 6/12 colours of the 900um buffer you are easily able to splice each buffer to the corresponding colour used by your trunking cable you are connecting to. In addition to this it is critical that we provide you an easy identification system such that once the packaging has been removed you can identify each and every pigtail. To do this we have used International Standards to ensure that each connector is perfectly colour coded. The colour standards that have been applied to the housing of all SC and LC connectors are as follows:-

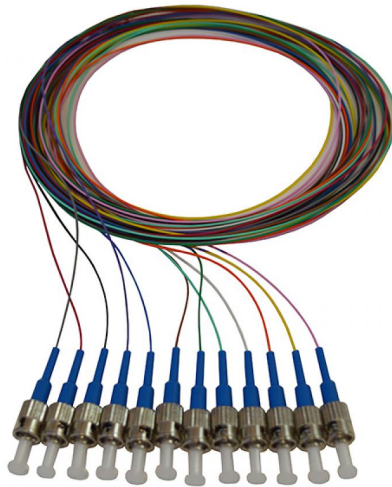

Beige OM1
Aqua - OM3
Erika Violet - OM4
Lime Green - OM5
Blue - Singlemode
Green - Angled Singlemode

Connector Choices

The standard connectors offered and stocked are typically SC, SCA, LC, LA and ST, however there are a variety of different connectors available in the range. We can offer the following connecti

Machine Polished

As all 900um Fibre Optic Pigtails are machine polished it is evident that the quality is high, this technique avoids human error ensuring all cable remains at our usual level of excellence. On the products arrival, 900um Fibre Optic Pigtails will be provided with factory test results to confirm the exceptional standard at which each rapidconnect 900um Fibre Optuc Pigtails has been manufactured.

Low Insertion and Return Loss

900um Fibre Optic Pigtails are all factory termianted and are provided with extremely low losses. If you have specific Insertion Loss (IL) or Return Loss (RL) requirements, please contact us as we are happy to create a product to your specification.
