fibresales Fibre Optic Cleaning and Inspection Kits

fibresales Cleaning & Inspection Kit

fibresales Cleaning & Inspection Kits combines all the tools necessary to conduct a high quality cleaning process for Fibre Optics. It comes packed full of useful products like; Soft Carry Case, Alcohol Dispenser, Cleaning Wipes, Disposable Unit, Safety Glasses, Cassette Cleaner, Refill Reel, 2.5mm One Click Cleaner, 1.25mm One Click Cleaner, 2.5mm Cleaning Swabs, and 1.25mm Cleaning Swab to ensure you have everything you need to keep your Fibre Optic connectors clean and usable

Included in the kit:

Soft Carry Case

The portable Soft Carry Case helps make Fibre Cleaning mobile and organised. All your Fibre Cleaning tools can be stored in one convenient carrier and taken with you wherever and whenever you need.

Alcohol Dispenser

The transparent alcohol dispenser holds up to 200ml, the push motion on the lid ensures the alcohol consumption remains convenient and controlled. Alcohol is not included.

Cleaning Wipes

In preparation of splicing fibres cleaning the end-faces thoroughly is essential. By combining the cleaning wipes with alcohol this should allow for a in-depth clean and ensure the Fibre Optic splice is successful.

Disposal Unit

The Fibresales Disposal Unit is for safely discarding of fibre scraps to ensure the safety of the user and those around.

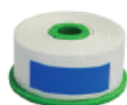

Safety Glasses

Safety should always come first, and the Fibresales Cleaning Kit is no exception. The addition of Fibresales Safety Glasses will prevent any unnecessary damage to the user's eyes when working with Fibre Optics.

Cassette Cleaner

The Fibresales Fibre Optic non-alcohol Cassette Cleaner maintains high quality fibre connections between connector end-faces. ensuring no scratches appear on any fibre end.

Cassette Cleaner Refill Reel

To maintain the lifespan of the Cassette Cleaner, the Fibresales Cassette Cleaner Refill Reel can replace the empty cartridge with a completely new one. This saves the expense of having to continually buy a new Cassette Cleaner every time the Reel runs out.

2.5mm One Click Cleaner

With one push the Fibresales 2.5mm One-Click Cleaner removes dust and oils attached to the end-face of the fibre optic connector. This pen can be used to clean SC/ST/FC connectors and 2.5mm adapters.

1.25mm One Click Cleaner

With one push the Fibresales 1.25mm One-Click Cleaner removes dust and oils attached to the end-face of the fibre optic connector. This pen can be used to clean the LC/MU connectors and 1.25mm adapters.

2.5mm Cleaning Swabs

The fibre optic cleaning swabs with a 2.5mm diameter tip are ideally suited to cleaning small contaminations on connectors and adapters.

1.25mm Cleaning Swabs

The fibre optic cleaning swabs with a 1.25mm diameter tip are ideally suited to cleaning small contaminations on connectors and adapters.

MTP/MPO One-Click Cleaner

The Fibre Optic MPO One-Click Cleaner removes dust and oils attached to the end-face of the fibre optic connector. This pen is designed to clean MTP and MPO connectors.

Included in a Inspection Kit

M200

The Yamasaki M200 Fibre Optic Microscope supports both Oblique and Coaxial viewing modes, allowing either a clear view of the fibre core or surface of the end face.

M400

The Yamasaki M400 Fibre Optic Microscope supporting Coaxial viewing mode, allowing surface view of the end face. This is critical for ensuring optimal connectivity.

A fibresales cleaning kit is an essential investment for maintaining optimal fibre optic performance. With its comprehensive range of tools, including lint-free wipes, cleaning pens, and solvent-compatible swabs, it ensures thorough cleaning of connectors and optical devices. By effectively removing dust, oil, and debris, the kit prevents signal loss.

Its compact and durable design makes it ideal for fieldwork and lab use, offering reliability and convenience in a single package. Choosing a fibresales cleaning kit saves time, reduces maintenance costs, and guarantees top-notch network performance.

Ordering Information
