fibresales Safety Glasses

fibresales Safety Glasses are designed to provide maximum protection and comfort in environments where eye safety is critical. Engineered with high-quality materials, these glasses safeguard your eyes from flying debris, harmful UV rays, and accidental exposure to hazards commonly encountered during fibre optic installations, splicing, and maintenance tasks.

Applications:

- Fibre optic cable installations and splicing
- General industrial applications
- Construction sites
- Maintenance and repair work
- Outdoor and indoor environments requiring eye protection

Key Features:

- **Impact Resistance:** Constructed from durable polycarbonate lenses, the glasses meet ANSI Z87.1 and CE EN166 standards for impact resistance, ensuring your eyes are shielded from high-speed particles.
- **UV Protection:** The lenses block 99.9% of harmful UVA and UVB radiation, providing essential protection during outdoor work.
- **Anti-Fog Coating:** Equipped with an advanced anti-fog coating to ensure clear vision in varying temperature and humidity conditions.
- **Lightweight Design:** The ergonomic frame design ensures all-day comfort without adding strain.
- **Scratch-Resistant Coating:** Protects the lenses from minor abrasions, extending the product's lifespan.
- **Wide Field of Vision:** Designed with wraparound lenses to offer an unobstructed view and peripheral protection.

Maintenance and Care

To ensure optimal performance and longevity:

- Clean lenses regularly with a microfiber cloth and lens cleaner.
 - Store in a protective case when not in use.
 - Avoid exposure to harsh chemicals or abrasive surfaces.
- ble: Ideal for use in various environments, from labs to workshops.
