fibresales Fibre Optic NF-811 Wire Tracker

NF-811 Wire Tracker

Complete with Amplifier Probe and Tone Generator

Portable cable tracing and basic diagnostic tool for RJ45 and RJ11 cabling. The NF-811 combines wire tracing, RJ45 continuity testing and telephone line condition identification in one practical field kit.

Applications:

- Structured cabling installation • Ethernet cable identification
- RJ45/RJ11 tracing • Telephone cabling • Communications cabinet maintenance
- Network troubleshooting • Existing cabling identification • Field service

Key Features:

- Complete with amplifier probe and tone generator
- Wire tracing for RJ45 and RJ11 cabling
- RJ45 continuity testing
- Identifies telephone line conditions
- Built-in speaker with sensitivity control
- Integrated LED light assists work in dark environments
- Portable operation using a DC 9-volt battery
- RoHS, FCC and CE compliance testing; ISO 9001 certification stated for the product

Specifications

Brand	NOYAFA	
Model	NF-811	
Battery	DC 9v battery	
Max working current	Emitter	< 30Ma
	Receiver	<80ma
Max signal voltage	8vp-p	
Signal distance	< 3km	
Size	180*85*35 mm	
Weight	113g	

Ordering Code:
