RJ45 ADAPTOR

Compact Ethernet Cable Extension Coupler

Extend an existing Ethernet connection

The RJ45 Adaptor joins two compatible RJ45-terminated copper Ethernet cables, providing a simple inline extension when an existing network cable does not reach the required connection point.

- Connects two compatible Ethernet cables\
- No cable re-termination required
- Compact inline design
- Ideal for network changes and equipment relocation

Key Features:

- | | |
|--------------------------------|--|
| • Product Type | RJ45 Adaptor / Coupler S |
| • Primary Use | Connect the compatible extension cable to the opposite side. |
| • Connection Style | Inline RJ45 Cable Connection |
| • Dimension (H x W x D) | 15.8 x 21 x 34.3 mm |

Typical Applications:

- Ethernet cable extensions
- Workstation or equipment relocation
- Communications cabinet changes
- Temporary network extensions
- Network maintenance and modifications.

Simple Installation

- Connect the existing RJ45 cable to one side.
- Connect the compatible extension cable to the opposite side.
- Confirm both connectors are seated securely.
- Test the completed network connection before service.

INSTALLATION TIP | Use a coupler when an extension is appropriate; replace damaged cable rather than using an adaptor to conceal a cable fault.
